Founded in 1996, VistaTek® is a second generation, family owned manufacturing company. VistaTek and its growing team has evolved into a US custom manufacturer with in-house capabilities including moldmaking, injection molding, and secondary operations. Our goal is to offer the best and most responsible manufacturing options to our customers.

VistaTek is passionate about keeping the future generations educated, engaged, and interested in manufacturing. We are currently achieving this with relationships, seminars, and sponsorships of local high schools, technical colleges, universities and internships.

Redefining Manufacturing - Our Mission, Our Passion.

Children learning about injection molding.
Assembling toy race cars at the press.
